SUMMARY

Dedicated and enthusiastic 3rd-year Computer Science Engineering student at Parul Institute of Technology with a strong foundation in programming languages and web development. Proficient in the MERN stack, passionate about building scalable web applications, and actively pursuing self-improvement. Demonstrated ability to contribute to real-world projects through internships and personal projects.

EDUCATION

B.Tech in Computer Science Engineering
Parul Institute of Technology
2022 - 2026

TECHNICAL SKILLS

- **Programming Languages:** Proficient in C, Java, JavaScript, Python; Familiar with C++
- **Web Development:** Front End Development with React, Back End Development, MERN Stack
- **Databases:** MySQL, MongoDB, PostgreSQL
- **Version Control:** Git, GitHub
- **Networking:** Network Essentials, Introduction to Computer Networking (Cisco)

CERTIFICATIONS

- **Network Essentials** (Cisco)
- **Introduction to Computer Networking** (Cisco)

SOFT SKILLS

- Problem Solving
- Team Collaboration
- Adaptability
- Critical Thinking

PROJECTS

Event Manager

A web application to manage events, where users can view upcoming events and register. Admins can manage users and assign roles.
GitHub Link

Chat App

A real-time chat application built with the MERN stack using Socket.io for live messaging.
GitHub Link

Crypto App (KoinX Clone)

A React.js application displaying live cryptocurrency value charts in US dollars.
